DATE RESPONDED:

11/13/2008

**SUMMARY:**

Aaron sent the following request via email:

Hi Mary and Kevin,

I'll be attending the public meeting tonight on behalf of Congressman Kirk and had just a few quick clarification questions.

Under EPA's proposed plan, what are the geographic limits of the dredge? Would only the inner harbor, the extension and the north harbor be dredged? Or would the entrance channel and the outer harbor be dredged as well?

Additionally, if EPA is not dredging the entrance or outer harbor, would dredging activities fall to the Army Corps if they were to occur?

Thanks!

Aaron

---

**RESPONSE:**

11/13: After checking with Kevin, I sent Aaron the following response:

Aaron,

I checked with Kevin and he said that EPA would dredge small parts of the Entrance Channel and then (lots) more into the Inner Harbor and on up into the Northern Harbor areas. The Approach Channel and the Outer Harbor areas are clean and the USACoE is (still) in charge of dredging them. Hope this helps.
